(charges based on sliding scale)

Additional Resource:

California's Master Plan on Aging identifies five goals by 2030 for older adults and people with disabilities. They include (1) safe housing; (2) health care; (3) inclusion and equity without isolation; (4) caregiving that works; and (5) affordable aging. The state will encounter many challenges and obstacles in achieving these goals. This website contains many thoughtful discussions and suggestions. (<https://mpa.aging.ca.gov/>).
